# Gainford House, Hartlepool

## BACKGROUND

Tivoli supported our client Home Group with a major garden transformation at Gainford House in Hartlepool, a supported living residence caring for those with learning disabilities and autism.

## PROJECT

The garden area at Gainford House was in desperate need of renovation. The uneven and sparse area did not allow for maximum use by the residents, which in turn limited the benefits they could gain from connecting with nature and spending time outdoors.

The Tivoli team included managers, operatives and account managers from across the UK, who all worked tirelessly to achieve an outstanding result in just 2 and a half days. Our suppliers also donated over £4,800 of products for the works.

The project involved stripping out the existing turf, flower/shrub beds and paving with appropriate machinery, and installing new turf, raised flowerbeds, feature benches, stepping stones, paving area and giving the fence a good clean.

## RESULT

Kath Shutt, Support Worker for Home Group, was thrilled with the amount and quality of the work delivered over such a short period. She passed on sincere thanks from the staff and residents, who were all delighted with the end result.

She said: "Huge thank you to all the lads who transformed our gardens at Gainford house, you were an amazing bunch and we will miss having you all around."
